Emergency lighting testing

Emergency lighting testing is the testing of the emergency lighting fittings and routes in a building. These series of tests ensure the lighting installation is compliant with I.S. 3217:2013. Tests must be carried out on a quarterly and annual basis.

Under Irish legislation it is a mandatory requirement to provide and maintain emergency lighting systems in all public and commercial buildings

CJK Maintain provides the following emergency lighting maintenance services:

Quarterly test – *Must be carried out by a competent operative*

- Fittings are visually inspected for physical damage/wear and tear;
- Fittings are inspected for functionality i.e. LED illuminated during charging, lamps lux levels are of required standard;
- The Emergency lighting system is activated for 30 minutes during which all fittings are monitored to ensure they stay fully illuminated for the duration of the test.

Annual Test – *Must be carried out and certified by trained licensed Electrician*

- Fittings are visually inspected for physical damage/wear and tear;
- Fittings are inspected for functionality i.e. LED illuminated during charging, lamp lux levels are of required standard;
- The Emergency lighting system is activated for 3 Hours during which all fittings are monitored to ensure they stay fully illuminated for the duration of the test;
- Certification is issued on completion of Test.

Upgrades and Advice – CJK Maintain are a team of industry professionals dedicated to ensuring the best system and service is provided for your business. We are available to analyse and advise on all aspects of lighting installations to ensure you are getting value for money and the health and welfare of your staff is prioritised.

CJK Maintain can provide the complete year round Emergency Lighting maintenance package to ensure peace of mind in the knowledge that the emergency lighting system will work reliably and safely in the event of an emergency.
